

SlipStream Software and TelereX announce strategic re-seller agreement for Benelux market

March 30, 2007

Atlanta-SlipStream Software, a leading provider of Manufacturing based root cause analysis and analytical software, announced a strategic re-seller relationship with TelereX. TelereX, located in Breda, the Netherlands and Antwerp, Belgium, is a major distributor for leading automation and process solutions for the Benelux market. This strategic re-seller agreement will allow TelereX to resell SlipStream's PM Event Analyzer, the first ever root cause analysis software focused on process manufacturing along with SlipStream's real-time root cause product RT-RCA and its simulation package RT-RCA/sim.

"TelereX and our customers are focused on process improvement and applications that bring true value and immediate returns. We see SlipStream Software root cause portfolio of products as something that is truly unique in the market and something that our customers see immediate value in," says Eric Van Nispen, Director Sales and Marketing, Industrial Software, TelereX.

"It is reaffirming for us when organizations like TelereX with a strong presence in the Benelux market immediately see what our root cause software can do for their customers. It is even more gratifying when these same customers embrace our software and understand the obvious benefit that it can provide," says Gary Hopkins, President, CEO of SlipStream Software.

About TelereX

For over 10 years TelereX has been a valued partner in Industrial Software. TelereX was founded in 1970 and is located in the Netherlands and Belgium. TelereX Industrial Software sells and supports industrial software solutions in the Benelux. With an experienced team of support engineers and a certified network of system integrators,

Telerex offers market-specific standard software, supported by extensive application and product knowledge.

About SlipStream Software

Based in Atlanta, Georgia, SlipStream closes the knowledge gap for manufacturers by providing the analytical tools that help them to be truly competitive. From our real time Enlighten application suite to the first ever root cause package, PM Event Analyzer these analytical tools are designed to provide quick ROI to the manufacturing world.
